Drawing Your Floor Plan

Use a pencil and the graph paper attached to design your new kitchen.

How To Measure

Tip

Pick a corner to start. Then measure the full length of the wall. Continue around the whole room.

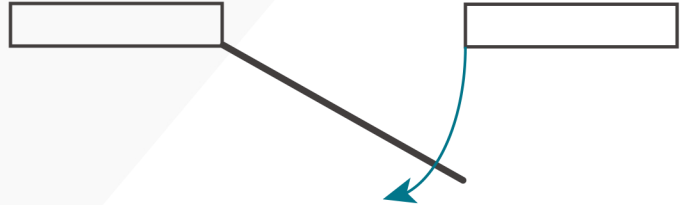

! Be sure to measure from the outside of the trim edge to the far wall.

! Make sure that all your measurements add up to the overall wall measurement.

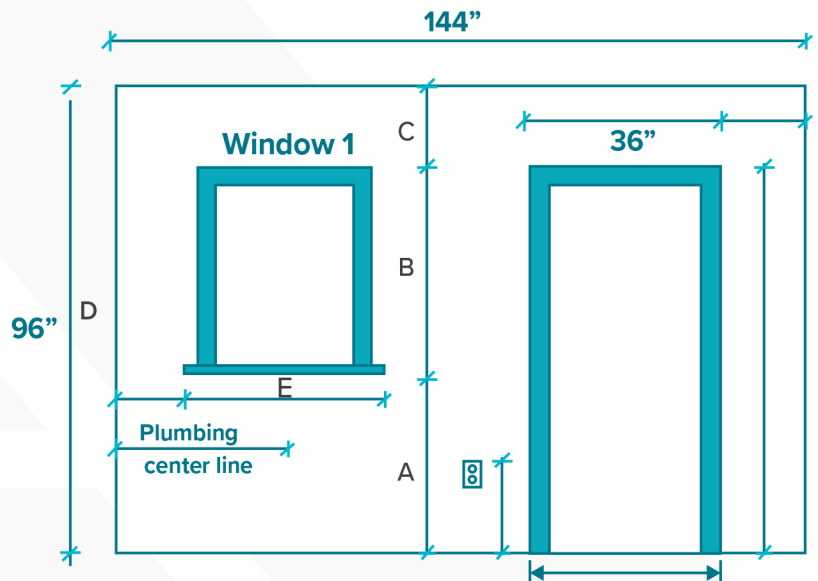

Mark all your measurements in inches only, so 7'6" should be marked as 90".

Indicate the direction of the door swing.

Measure all objects on the wall (windows, doors, electrical outlets, gas lines, ventilation duct work, A/C vents).

Measure all the window and door openings from outside trim edge to outside trim edge

Window Measurements

Name Width Height Distance From Floor

Appliances In Your New Kitchen

If unable to provide model numbers, please answer the following questions:

Counter depth or standard depth appliances?

Cooktop or range?

Over the range:

Stainless steel hood to the ceiling? ☐ Yes ☐ No

Hood under wall cabinet? ☐ Yes ☐ No

Wood hood? ☐ Yes ☐ No

Microwave? ☐ Yes ☐ No

Double ovens or micro-oven?

If it's a double oven and separate microwave, where would you prefer the microwave?

Sink:

Under-mount or apron front?

Additional Information

Is this project a renovation or new construction?

If new construction, which phase of construction is the project in?

Are the walls up?

☐ Yes ☐ No

For new construction, we provide an initial design and quote to plan for plumbing, electric, and budget. Walls should be re-measured once in place. Ideally, final revisions will be submitted about 2 weeks before ordering.
